Would you please consider the following language with regards to Section IV, A (b) (iii) Amenities as it relates to public transit:

Site is within ¼ mile of an established public transportation stop along paved roads, sidewalks, or established pedestrian walkways. The stop must rest along a transit line that follows a fixed route and daily schedule serving the public no less than 5 days per week.

This change would enable smaller, less urban communities to be eligible for the these points as well.
