

Supportive Housing

2025 IMPACTS

North Carolina Housing Finance Agency's supportive housing programs provide quality emergency, transitional and permanent housing.

2025 Agency investments in supportive housing development will create **270** units of quality, safe supportive housing for North Carolinians who have low incomes, are living with disabilities or have special housing needs, such as domestic violence survivors, veterans experiencing homelessness or children aging out of foster care.

At least **10%** of rental units financed with Low-Income Housing Tax Credits are dedicated permanent supportive housing for people living with disabilities.

LONG-TERM RESULTS

By providing affordable housing with wraparound services, permanent supportive housing lowers public costs by providing alternative housing opportunities instead of temporary facilities like jails, emergency rooms and emergency homeless shelters.

One study found that affordable housing coupled with supportive services reduced Medicaid expenses of tenants who are elderly or have disabilities by an average of **\$6,000** per person per year. Furthermore, research shows that, in the United States, for every dollar spent providing permanent supportive housing about **\$1.80 is saved** in averted costs such as healthcare as well as judicial and law enforcement costs.

Residents in supportive housing report higher overall satisfaction with their housing quality, experience increased housing stability, face less risk of eviction or homelessness and are less rent-burdened. In addition, households living in supportive housing experience higher rates of family reunification, which helps children return safely and quickly to their families.
