2022 Impacts

2022 Agency investments in supportive housing development will create **143 units** of quality, safe supportive housing for North Carolinians who have low incomes, are living with disabilities or have special housing needs, such as domestic violence survivors, veterans experiencing homelessness or children aging out of foster care.

At least **10%** of rental units financed with Low-Income Housing Tax Credits are dedicated permanent supportive housing for people living with disabilities through the Targeting Program, a partnership between the Agency and the NC Department of Health and Human Services.

Long-Term Results

By providing affordable housing with wraparound services, permanent supportive housing has been found to lower public costs by providing alternative housing opportunities instead of homeless shelters, jails and emergency rooms.

One study found that affordable housing coupled with supportive services reduced Medicaid expenses of tenants who are elderly or have disabilities by an average of **$6,000** per person, per year. Based on this figure, North Carolina’s Targeting Program could save $3 in health care costs for every $1 invested in the Housing Credit.

Residents in supportive housing report higher overall satisfaction with their housing quality, experience increased housing stability, face less risk of eviction or homelessness and are less rent-burdened. People living in supportive housing experience higher rates of family reunification, which helps children return safely and quickly to their families.
