Subject: Another comment for 2022 QAP

Hi Scott and Tara,

I have another comment for the 2022 QAP. Could you please add on page 8 of 35 under E. 3. Agency-Designated Basis Boost. Open this up to also allowing 4% LIHTC/bond new construction projects to request a boost up to ten percent (10%) but without requiring the deeper targeting, if that's possible. It would be great if bond projects could request up to a 20% boost, but if you can only do 10%, that would help.

This would really help us do bond projects that are not located in a QCT/DDA. Historically, most bond projects have only worked in QCT's or DDA's.

Thanks,
Traci
