Re: Draft 2021 QAP

Dear Sir/Madam:

On behalf of the City of Winston-Salem, I am pleased to see changes to the tiebreaker scoring criteria in the draft 2021 QAP, in particular the removal of the prior First Tiebreaker – “The project in the census tract with the lowest percentage of families below the poverty rate.”

Winston-Salem is committed to providing all our residents with the chance to live in high-opportunity neighborhoods. This includes revitalizing and reinvesting in underserved communities whose residents also deserve access to quality affordable housing, jobs, services and transportation, without needing to uproot their families and leave their social networks and supports.

In 2015, our great city adopted an affordable housing policy that all neighborhood developments seeking public investment—local, state, and federal, including LIHTC—must include a mixed-income component. This strategy prevents eventual displacement, especially from those historically underserved/underinvested communities closest to critical business districts, that often results when land becomes cheap and large public and private investment occurs. This approach enables long-time residents in these neighborhoods to continue their contributions to, and also reap the benefits from, the economic expansion taking place around them.

Eliminating “the census tract with the lowest percentage of families below the poverty rate” as a tiebreaker provides more opportunity and choice for low-income families, and supports Winston-Salem’s efforts to improve the quality of life for all our residents, no matter the census tract in which they live.

Sincerely,

Allen Joines
Mayor
